

Secure Connection as a Service

Rapidly Deployable Secure Remote Work Solution

Enable 1,000 employees to work remotely in only 2 days
for as little as \$11 per employee per month*

Ensure Continuity of Operations with Rapid Deployment of Secure Employee Remote Access

Rapidly changing operational challenges such as global pandemics mean that organizations must be ready to enable employees to work remotely on short notice. Blacksands' SCaaS solution enables unrivaled rapid deployment, world class security and unparalleled scalability.

Simple

No complex software is required. Blacksands is a cloud based service. We provide an easy to install virtual Receiver. Management requires no specialized IT staff; access can be controlled in a simple interface.

Secure

Blacksands brokers point-to-point encrypted connections (never touching your data), creates an Invisible Edge, and a full audit trail: who, what, where, and when of every connection.

Scalable

Receivers are deployable in countless network configurations in local or cloud environments at no-cost. New connections can be created in seconds. Banded pricing is based on the number of users and services decreasing based on volume. You can instantly manage your connections based on your immediate requirements.

Why not try a no-cost pilot? For more details:
